Essential Information for all Workshop Participants:

- Pots should be made out of open body Raku clay and must be bisque fired.
- For best results (and to reduce risk of cracking due to thermal shock) clay should be of even thickness.
- Also remember the pots will be lifted out of the kiln with metal tongs when red hot and so please don't make pots too heavy.
- Maximum height of pieces for the kilns: 50cms.
- No flatware please.
- Glazes will be supplied for your use. Do not bring your pot already glazed, only the above glazes will be used.
- Reduction will be with newspaper or sawdust/wood shavings (please bring any if you have it).
